

IT PAYS TO TAKE A LOOK INSIDE YOUR COMPRESSOR ROOM

On any working day, you can focus on your production while the compressed air installation is reliably doing its job, safely tucked away behind closed doors. But it may be a good idea to pay a visit to your compressor room and have a look around.

Maybe you've purchased a new compressor, and you haven't decided what to do with the previous one. Or the lease on one of your compressors has expired, and it's time to renew it.

Possibly your compressed air capacity requirements have changed, due to modifications in your production process. And perhaps the energy efficiency of your compressed air system can be improved by upgrading to more recent technology.

An unused compressor may be standing around, occupying valuable floor space. And because it is not used, it is deteriorating quickly.

In all these cases, it makes sense to talk to OriginAir. We can buy back your unused compressors. Refurbish them. Bring them up to modern standards of technology and environmental legislation.

OriginAir

NEARLY NEW, COMPLETELY CERTIFIED

At Atlas Copco OriginAir, previously owned equipment is upgraded to 'nearly new' status. The machines are treated with the expertise and product knowledge of the original equipment manufacturer. Available updates and modifications ensure the products meet all modern energy efficiency requirements.

The OriginAir certification is awarded only after extensive testing of the refurbished machines. It reflects the high standards of a trusted brand in terms of quality, reliability and global service support.

OriginAir offers pre-used equipment with high value, ready to earn its place in a new application. Perhaps even in your compressor room.

Sustainable Productivity

We stand by our responsibilities towards our customers, towards the environment and the people around us. We make performance stand the test of time. This is what we call – Sustainable Productivity.

DISCOVER THE OPPORTUNITIES BEHIND THIS DOOR

This compressor will soon be replaced by the new one you ordered. But what about this one? We are interested in buying it back.

This compressor is no longer in use. But an unused machine deteriorates quickly. Let us restore it to a useful existence.

As your production needs have changed, this compressor is no longer a perfect fit. Replacing it by a properly sized model will increase your energy efficiency.
