

Accredited Quality Assurance Calibration

Secure your quality – correct adjusted tools in production

Atlas Copco's accredited quality assurance calibration provides:

Traceability assurances of the production process

Lower rework, warranty and recall costs

Reduced risk of liability claims and reputation damages

Accredited Quality Assurance Calibration

Take care of your quality process

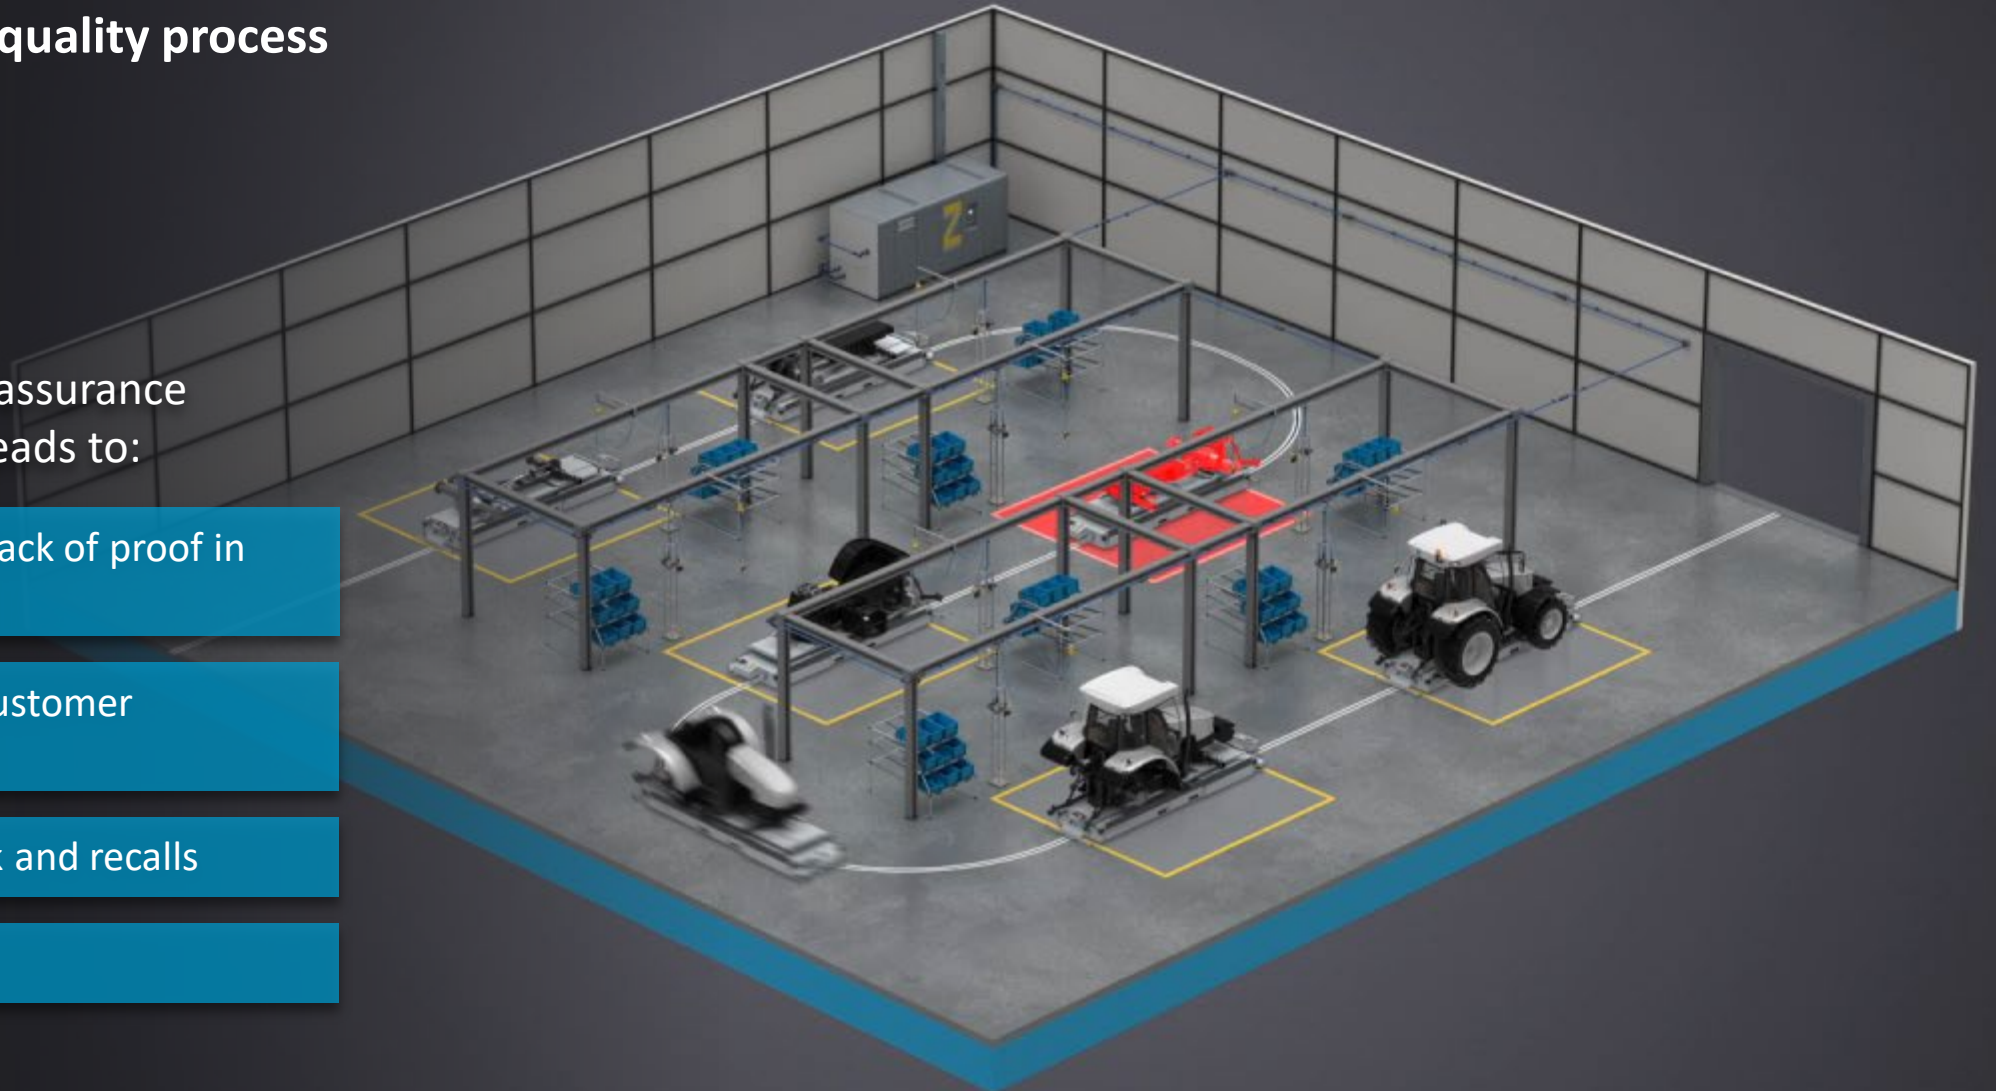

Neglecting quality assurance calibration, often leads to:

No traceability and lack of proof in liability issues

Quality issues and customer dissatisfaction

Risk of costly rework and recalls

Audit issues

Deliverables

- Measurement equipment calibration certificates following global and national standards
- Accredited lab and accredited on-site calibration services
- Functional test before calibration
- Calibration including adjustment where applicable
- Performed only with traceable reference equipment
- Calibration due-date reminders
- Retrievable calibration certificates for at least 10 years

Accredited Quality Assurance Calibration

Measurement equipment calibration is the first step of securing quality control of your production, reducing rework and liability cost. Performed by our calibration experts, all Atlas Copco calibrations fulfill global and national requirements.
