

# ToolCover Stability

Optimize your tools – minimize your costs

Atlas Copco's ToolCover Stability solution gives you:

Smart and transparent optimization of your tools' maintenance – based on your specific production

Fixed budget offering with no sudden increases and total cost control – including spare parts costs

Maximized equipment lifetime

All tool maintenance, calibration and repairs included

Improved productivity

Lower total cost of ownership – with full warranty

# ToolCover Stability

**Every tool has its own specific needs based on your production process**

Not optimizing maintenance & calibration for your tool park based on your production data often leads to:

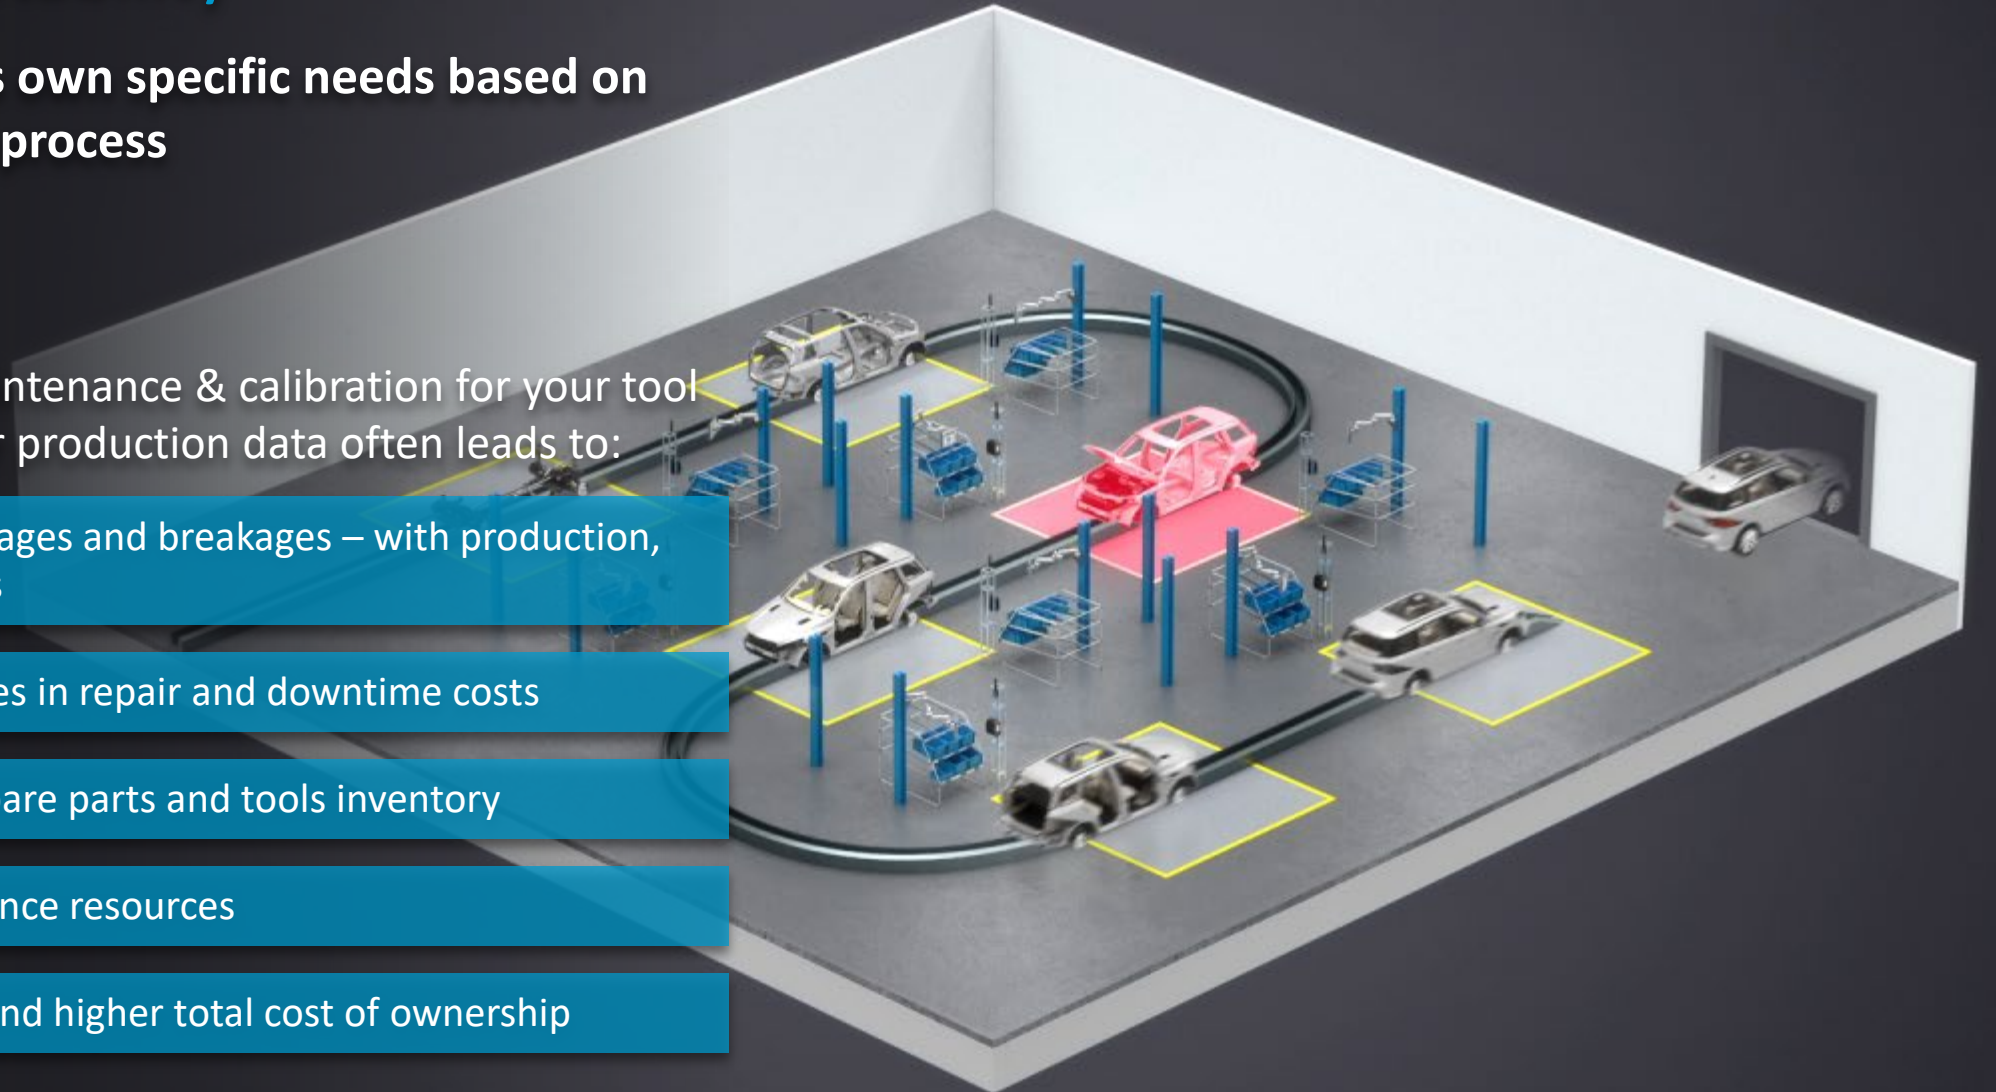

Recurring line stoppages and breakages – with production, quality and data loss

Unexpected increases in repair and downtime costs

Unnecessary high spare parts and tools inventory

Increasing maintenance resources

Lower cost control and higher total cost of ownership

# Deliverables

- Optimized Preventive Maintenance and Calibration cycles – tailored to your specific production needs
- Contract life time warranty
- Repairs and spare parts
- Lowered turnaround time with priority workshop access
- KPI tool measurement with efficiency improvement reports
- Fixed budget offering with total cost control

## ToolCover Stability

With ToolCover Stability, optimize your tool care tailored to your specific production needs – all at a fixed price and a lower total cost. Let your tools work for you and let the professionals optimize your tool care.

Optimize your tools – minimize your costs

The Atlas Copco logo is centered on the page. It consists of the company name "Atlas Copco" written in a white, elegant, cursive script. The text is flanked by two thick, white horizontal bars, one positioned above and one below the name. The background is a solid blue color with a faint, white technical drawing of a mechanical assembly in the bottom right corner.

*Atlas Copco*
